

Aliza Parveen || Android Developer

alizaparveen1112@gmail.com | [0341 6183741](tel:03416183741) | Bahawalpur, Pakistan

Professional Summary

Android Developer with hands-on experience in designing, developing, testing, and deploying Android Applications using Kotlin and Android Studio. Experienced in the complete app development lifecycle, from UI implementation and API integration to debugging, performance optimization, app signing, and Google Play Store deployment. **Skilled in Google Play Console**, App Bundle (AAB) generation, release management, version updates, and Play Store policy compliance. Proficient in MVVM, Firebase, Room Database, REST APIs, Git, GitHub, Hilt, Coroutines, and Flow. Currently expanding my expertise in Flutter to build high-quality, cross-platform mobile applications.

Technical Skills

- **Languages:** Kotlin , Dart (Basic)
 - **Architecture:** MVVM , Clean Architecture
 - **Frameworks :** Android SDK , Flutter (Basic)
 - **Libraries:** Retrofit , Glide, Room, Hilt , Kotlin Coroutines , Flow
 - **Platform & Services:** Firebase , Google Play Console
 - **Tools:** Android Studio, GitHub , Git
 - **Other Skills:** Rest APIs , JSON Parsing ,Performance optimization , API Integration , UI/UX Designing
-

Projects

1.Memes4u – Funny memes app (Published on play Store)

Kotlin | Firebase | MVVM

<https://play.google.com/store/apps/details?id=com.alizaapps.memes247>

- Android application that provides users with a large collection of trending memes organized into multiple categories.
- Implemented a clean and responsive UI with Firebase integration for dynamic content management, allowing new memes to be added without app updates.
- Integrated image loading, sharing, downloading, and category-based browsing to enhance user engagement.
- Managed the complete development lifecycle, including UI design, Firebase backend integration, testing, debugging, app optimization, release management, and successful deployment on the Google Play Store using Google Play Console.

2. Beacon – Local Business Discovery App

Google Maps API | Firebase Realtime Database | Location Services

- Developed an Android application that enables small business owners to register and manage their business information, including shop details and live location.
- Allows customers to discover nearby local businesses, view their contact information and locations, and connect with them for products and services.
- Implemented functionality for business owners to add and manage multiple shops, including business details, contact information, and real-time location.

3. BuyNow – Online Product Marketplace

Firebase Realtime Database | Firebase Authentication | Kotlin

- Developed an e-commerce Android application that allows sellers to list and manage products across multiple categories.
- Implemented secure user authentication and real-time product management using Firebase Authentication and Firebase Realtime Database.
- Enabled users to browse products by category, view product details and search for items based on their preferences.
- Implemented features for adding, updating, and deleting product listings, allowing sellers to manage their inventory efficiently.

Additional Projects

- Notes App (Room Database)
- Weather App (Rest APIs)
- Social App (Firebase)
- Tour Guide App (Google Maps)
- Fortune Teller (API Integration)

Education

BS Software Engineering

In progress (2023 – 2027)

Soft Skills

- Leadership
- Problem Solving
- Team Collaboration
- Analytical thinking
- Time Management
- Communication
